 CONNECTOR **Heavy Duty, 7-Pole, Round Pin**
 HITCH **42,000 Lb Drawbar Ring**
 SAFETY **Class 4 Safety Chain, Breakaway Kit**
 RATCHET STRAPS **5,400 Lb Cap Webbing**

USER CENTERED DESIGN

When you combine the **experience** and **knowledge** of 30 year Journeymen with **disciplined industrial designers** and utilize the **latest technologies** v **save lives** while improving them.

The GUS is a culmination of everything we've learned and tested. Save time, eliminate annoyance, reduce injuries and costs by:

- Securing a large switch crate neatly over multiple power poles.
- Mount multiple bulky cross arms on a rack within prime reach to eliminate the strain of pulling interlocking materials out of the bed.
- Neatly organize clips, washers, brackets, nails, and descending length bolts in securable bins and place a cross arm in front of them on our staging braces for assembly at prime height.
- Place a 4,000 lb Reel on the racks to eliminate another trailer on the job.

The advantages are too many to list here. Find out yourself and order yours today. Your crew will thank you!
